This region is very good especially for hiking lovers. It offers many touristic trails leading through the scenery of the rocky towns, themesas, the passes, deep gorges and hillsides. While walking through the countryside you may find the fossils of former sea animals. You will be fascinated by an articulation of the landscape as

Your trip can become perfect when you stay over in some of the local cosy pensions or hotels. Thank to the local articulation we recommend this area for bikers who love more exacting terrain.

## Fortresses and Castles

### Small castle Sokolí hnízdo (Falcon's nest)

It's difficult to imagine Pravčická gate without the small castle, Sokolí hnízdo. At the start of tourism in the Pravčická area there was a house, covered in rind, which served as a bar. Děčínský zámek leží na skalním ostrohu nad soutokem řek Labe a Ploučnice. Jeho historie se datuje již k 10 století n.l., kdy předchůdce dnešního zámku bylo dřevěné opevnění, které sloužilo jako stěžejní bod správy oblasti, tzv. Děčínské provincie.

From the top of the former castle you can have a very nice view of the surrounding area. In the southeast you can see Chřibský hill and in the south Studenec hill. Chřibský castle was probably established in the 14th century by the Michalovec's clan. As well as other castles in the region, this one was built as a protection for tradesmen going towards Lužice. Location: 2 kms northwest from Chřibská Severozápadně od Chřibské

## Skalní hrad - Kyjovský hrádek (Horní Karlštejn)

The access to the ruined castle is very interesting experience. The trail leads through narrow paths in the rocks and up steep stairs. At the top you are rewarded with a beautiful view. This castle is considered the largest of the castles in the region built for the protection of the trade routes. It is also the most mysterious one because of its past. The castle is said to be built in the 14th century. The castle was surrounded by two moats and a wooden wall. It was impossible to get a carriage inside. The castle's height reached probably 40 metres.

### Natural heritage

## Malá Pravčická brána

If you saw this gates bigger sister, Pravčická Gate, you'll understand why it's called The Small Pravčická Gate. It is only 2.3 meters high, 3.3 meters wide and 1 to 1.5 meters long. Despite that it is really an interesting place to visit on your walks through this picturesque scenery. On the way there, following the red tourist trail, you can also visit lots of viewpoints e.g. Mary's and Vilemín's view point or Rudolf's stone.

Location: North of Vysoká Lípa Directions: From Jetřichovice follow the red tourist trail to Mezní Louka. On the way there is a sign where to turn to Small Pravčická gate. Opening hours: Opened throughout the year,

### Mariina Vyhlídka

There used to be a magical view from Mary's viewpoint. There used to be a stand high on the rocks it was a wooden arbor. Unfortunately the arbor was burnt in September 2005. Fortunately the fire didn't spread further. Hopefully there will be a new viewpoint in a short time. Mary's viewpoint was built by the Kinski family. The Kinski family also built Vilemín's viewpoint and Rudolf's stone.

Location: Jetřichovice Direction: From Jetřichovice follow the red tourist trail.

### Rudolfův kámen

The viewpoint as well as the Mary's and Vilemín's viewpoint was built by Kinski family in the first half of the 19th century. It used to be called "A high stone" because of its thrust above the other rocks near Jetřichovice.

There is a very nice view of the town from the top. Location: Jetřichovice Direction: There is a path with the stone stairs at its end leading to the top. The walk is difficult. Opening hours: Open throughout the year

### Pastýřská stěna

This romantic imitation of a castle was built on a high rock 150 meters above the left bank of the Elbe River. From the castle there is a wonderful view of Děčín and its castle that stands high on a rock on the opposite bank of the Elbe. Directions: By car, bike or on foot go directly to the restaurant on Teplická st. You turn to Husova st. At the zoo garden there is a sign showing how to get to Pastýřská stěna.

The 16 meter high view tower, Velký Chlum, is situated on the hill of the same name at the 508ms altitude. It was built in 1928 and 1929 by The Mountain Club of Bohemian Switzerland. In 1997 the view tower was rebuilt and opened to the public. It gives a nice view of Děčín and the Elbe river. You can see as far as the tops of Czech středohoří and also the German side of Saxon Switzerland. You can see Grosser Zschirnstern and Grosser Winterberg. Directions: Take the bus line no. 2 to the final stop, Staré město, From there you walk across the railway crossing. Follow the red trail markers up to the Chlum view tower. ## Belveder

There is an amazing bird's eye view from The Belveder. You can see the Elbe canyon, a huge valley surrounded by high rocks with the Elbe River flowing through. In the summertime, at evenings, when the sky is painted with so many beautiful colors, it's a magical place. Maybe that was one reason why František Clary-Aldringen had the terrace built (1701 - 1711). Opening hours: View from the terrace: no admission  
Restaurant: January to February opened only on Saturdays and Sundays 11:00 to 16:00. March to December opened Wednesday to Sunday 11:00 to 21:00.

## Růžovský vrch

This 619 metre hill is sometimes called "Děčínská Fudžijama" because of its bulk and dominating presents in the countryside. Nowadays you get only a limited view while climbing the hill-side because the trees which burned off in the early 20th century have grown back. The climb up the hill is actually a very interesting experience. Today "Růžák", as the hill is called by local people, belongs to the 1st zone of the national park. During the Napoleonic wars the observation point was built on the top. In the end of the 19th century the owner, Clary-Aldringen, had a view-tower built along with a pub to serve tourists from far and wide. Then in the 1930's everything was burned and left in ruin. So today you can find only a few charred remains.

## The dwarf's cave (Trpasličí jeskyně)

It is not hard to climb up the hillside where there Snow White and the seven dwarves are carved in the rock. This charming place can be found near the road from Rynartice to Jetřichovice. In 1833 the sculptor Ernest Wahr carved these figures in the rock. It is a fun game to find all the seven dwarves. It will be difficult to find them all but you definitely can.

## Suchá Kamenice

This is a small stream where the water flows only from autumn to spring. In the stream there are lots of stones and boulders and they create a small waterfall. In winter this place is so magical. The water is frozen here and there and makes wonderful icewalls. The whole place is very peaceful and romantic even in summer when the stream is usually dry.

Directions: The best way to get to Dry Kamenice is to follow the red tourist trail starting in Hřensko. Go for about 1 kilometer and then continue on through the canyon up the Labská hillside where you can visit a wonderful tourist restaurant with a terrace. Or you can change the direction and from the river's canyon follow the blue touristic trail leading to Arnoltice.

## Vlčí deska (Wolf's Desk)

In the 17th century someone carved out of the rock a stone desk and hewn onto it a story of a huntsman who killed two wolves. For a time this stone desk was hidden and lost to us because of a fallen tree. After some time the desk and the mystic story were discovered again. The huntsman's descendants still live in the region and maintain the desk so they and other people can read the story again and again and again. The trail to the Wolf's desk leads through Kyjovské valley, the canyon of Křinice river. It is famous for its beauty.

# Šluknovsko and Lužické mountains

The scenery is really beautiful there, inviting for many trips. The whole region is attractive for biking lovers for its beauty and modesty of cycling trails. In the surrounding area there are a lot of view towers where you can have a wonderful view of the scenery. In winter Lužické mountains are a good place for skiers. There are lots of adjusted trails for cross-country skiing as well as the downhill skiing. We also offer many cosy pensions where you can spend pleasant moments of rest and peace.

# Tisá

Tisá and its surrounding is a rocky area at the border with Germany. This region is composed of a beautiful rocky unit of Tiské walls and the surrounding of the mesa Děčínský Sněžník. Tiské walls belong among the oldest touristic areas of Labské sandstones. You can find there the rocky towns full of many rocky columns, eaves, caves and other very interesting shapes. Tiské walls are divided into two parts – the big and the small walls and they both are connected with an educational trail. Děčínský Sněžník is the highest mesa in the Czech republic. From the viewtower of the same name you can have an amazing view of the whole area of Labské sandstones and when it's fair weather you can see as far as Ještěd.

## Lookouts

### Děčínský Sněžník

At a height of 723 meters, Děčínský Sněžník rises about the town of Děčín. It is located on the highest mesa in the country. There is a view tower on the mountain with the same name as the mountain itself, Děčínský Sněžník. Děčínský Sněžník is attractive not only for the magical view of Lužické mountains and Czech Saxon Switzerland but also for its unique air quality. Thanks to the thermal air currents around the mesa, the local air mixes with winds blown in from the north sea. The dry thermals mixed with the fresh sea air make for an especially healthy air quality. The local people refer to the area as an "air spa"

Directions:

By car you go 1.5kms to the view tower (either from Děčín or Jílové u děčína). You will find a paid parking
